Brett Longworth

Research Associate III, Marine Chemistry and Geochemistry
David Center for Ocean Innovation, MS#61, Woods Hole Oceanographic Institution, Woods Hole, MA 02543
blongworth@whoi.edu · (508) 289-1559 · orcid.org/0000-0001-8318-2054

RESEARCH INTERESTS

- Dissolved gasses as tracers of ecosystem function in seawater.
- Microcontroller systems for sensors, platforms, and telemetry.
- Shipboard sensor data acquisition and integration.
- Data communication using interactive web applications.
- Improving the efficiency, reliability, and precision of field-deployed quadrupole mass spectrometry.
- Radiocarbon as a tracer of carbon source in natural systems.

SKILLS

- Shipboard and laboratory experience with mass spectrometry, gas handling, and chemical analysis.
- Development of sensor platforms and telemetry systems for oceanographic research.
- Proficient in R, Python, SQL, UNIX, Shell, HTML, and LabVIEW.
- Skilled with C++ and Visual Basic.
- Some experience with Matlab, Javascript and C.
- Versioning and collaborative development with git/GitHub.
- Cloud and local development/deployment of data-driven web applications and data pipelines.
- R/Python skills include data analysis, report generation, interactive web applications with Shiny.
- Agentic coding skills including pipeline validation and testing, agentic embedded development.
- Extensive troubleshooting skills.
- Microcontroller programming for data acquisition and communication using C++ and MicroPython.
- Certified coding and data science instructor for The Carpentries.
- Some design and CAD experience with SOLIDWORKS, Fusion, and KiCAD.
- Development of small and large mass spectrometer beamline improvements and gas handling systems.
- Statistics for data reduction/analysis and quality assessment.
- Qualified WHOI small boat operator.

PROFESSIONAL EXPERIENCE

Mar 2026 – Present Woods Hole Oceanographic Institution — *OOI*
Pre- and Post-deployment tank testing of sensors including deployment, recovery, discrete sampling and analysis of pH and DIC. Wrote data reduction package for processing and correction of temp, salinity, pH and DIC data.

Jan 2023 – Present Woods Hole Oceanographic Institution — *Machine Lab*
Microcontroller coding, deployment, and troubleshooting of quadrupole mass spectrometer and acoustic Doppler velocimeter based sensors and platforms. Development of platform telemetry systems. Data pipelines for reductions of Gb–Tb sized datasets.

Nov 2021 – Present Woods Hole Oceanographic Institution — *NES-LTER Cruises*
Measured O2/Ar via equilibrator inlet mass spectrometry, sampling for dissolved gasses. Activity planning, deck and lab operations for CTD/Rosette, additional sampling and sample processing for LTER group.

Nov 2023 – Jan 2026 Woods Hole Oceanographic Institution — *LOC-NESS Project*
Realtime and web-based mapping and data display, underway sensor and shipboard data interfaces. Sensor calibration and data acquisition. Deck operations for CTD and drifters. Data reduction and QA/QC for underway and drifter data.

Mar 2006 – Nov 2023 Woods Hole Oceanographic Institution — *NOSAMS Research Associate*
Daily operation, maintenance and development for determination of radiocarbon using accelerator mass spectrometry at the National Ocean Sciences AMS facility.

Oct 2013 Woods Hole Oceanographic Institution — *Cruise Leg: GEOTRACES EPZT, Eastern Pacific*
Sampling for dissolved noble gasses, radiocarbon, DIC and tritium in seawater. Ran console for rosette casts. Underway analysis of O2/Ar ratios via membrane inlet mass spectrometry.

Nov 2011 Woods Hole Oceanographic Institution — *Cruise Leg: GEOTRACES NAT, North Atlantic*
Sampling for dissolved noble gasses, radiocarbon, DIC and tritium in seawater. Ran console for rosette casts. Underway analysis of O2/Ar ratios via membrane inlet mass spectrometry.

Jan 2009 Woods Hole Oceanographic Institution — *Cruise Leg: ANDREX JC030, Weddell Sea*
Sampling for dissolved noble gasses, radiocarbon and tritium in seawater.

Jan 2008 Woods Hole Oceanographic Institution — *Cruise Leg: CLIVAR I6S, 30°E, Southern Ocean*
Sampling for seawater helium and tritium, onboard dissolved gas extraction for helium analysis.

Nov 2004 – Feb 2006 University of Massachusetts — *Research Technician*, Amherst, MA
Mapped hydromorphology of stream reaches using palmtop GIS and profiled current and bathymetry using ADCP. Integrated data for use in basin-scale GIS and mesoscale stream habitat models. Coordinated field work for projects on three rivers in the northeastern U.S.

Jan 2003 – Aug 2004 University of Massachusetts — *Stable Isotope Lab Technician*, Amherst, MA
Tested, developed methods, maintained, and assisted others in the use of a newly installed EA-IRMS system for determining δ13C and δ15N of organic materials and a Finnigan GasBench sample preparation system for analysis of δ18O of water samples.

Sep 2002 – Jun 2005 University of Massachusetts — *Master's Thesis Research*, Amherst, MA
Developed protocols and gathered data for studies of shale, soil and riverine organic matter in biogeochemistry and stable isotope laboratories. Researched sources of aged organic carbon to the Hudson river system.

Jun–Aug 2002, Jul–Aug 2004 Marine Biological Laboratory — *Field Research Assistant*, Toolik Lake LTER, AK
Studied carbon and nitrogen dynamics of wet sedge and tussock tundra ecosystems at the Arctic LTER using 14C and 15N tracers.

Jan–Jun 2002 University of Massachusetts — *Laboratory Instructor and Manager*, Amherst, MA
Prepared and taught introductory geology laboratory. Coordinated lab activities and field trips for five lab sections and instructors.

Jun–Sep 1997 University of Massachusetts — *Field Research Assistant*, Amherst, MA
Provided apple pest forecasting data and determined effectiveness of treatments in an experimental integrated pest management program in 14 Western Massachusetts orchards.

Jan–Jun 1997 University of Massachusetts — *Independent Study*, Amherst, MA
Studied the deep phylogeny of chordates using cladistic analysis of mitochondrial genomes.

EDUCATION

2001 – 2005 University of Massachusetts, Amherst, MA
M.S. Geosciences, August 2005. Thesis: *Role of non-modern carbon pools in riverine and global carbon cycles.*

1995 – 1998 University of Massachusetts, Amherst, MA
B.S. Biology, concentration in ecology and evolution. Year exchange in Freiburg, Germany.

1992 – 1994 University of Maine, Orono, ME
Biology and geology (no degree conferred).

TEACHING

- **2026** Helper for IS-sponsored Agentic Coding Workshop, WHOI.
- **2023 – present** Organize and help teach two-day Carpentries courses using R, Python, git/GitHub, and shell.
- **2021** Lead instructor for Data Management with SQL. Database skills course for WHOI technical staff.
- **2020** Lead instructor for Reproducible Data Science with R and Git, Software Carpentry course for WHOI technical staff.
- **2020** Lead instructor for R for Reproducible Data Science, Software Carpentry course for WHOI JP/SSF students.
- **2020** Certified as an instructor for The Carpentries. Created WHOI Data Science Slack.

- **2019** Assisted teaching R in NES-LTER summer lecture series.
- **2018** Assisted with Data Carpentry course in introductory R programming.

SERVICE

- **2022 – present** WHOI Technical Ladder Review Implementation Committee
- **2022 – present** WHOI Ocean Informatics Working Group
- **2020 – present** WHOI Technical Staff Mentoring Group
- **2024 – 2025** WHOI Workplace Climate Committee
- **2019 – 2022** WHOI Technical Staff Committee
- **2019** WHOI Technical Ladders Review Committee

AWARDS

- **2024 – 2026** Funding from APO for two two-day Carpentries workshops.
- **2023** Joint funding from APO and DDVPSE for two two-day Carpentries workshops.
- **2021** Technical Staff Training Award. Co-PI with Sarah Glancy and Joe Futrelle. Awarded funds to teach a 4h workshop on relational databases and SQL for WHOI technical staff.
- **2020** Technical Staff Training Award. Lead PI with Amber York, Karen Soenen, and Stace Beaulieu. Awarded funds for three short domain-specific data science workshops and one two-day workshop in reproducible research with R.
- **2019** Technical Staff Training Award. Co-PI with Stace Beaulieu, Amber York, and Karen Soenen to become certified data science instructors for the Carpentries and deliver data science training workshops.
- **2009** Mellon Joint Initiatives Award. Joint award with Laura Robinson to develop a method for direct sputtering of carbonates for AMS.
- **2004** Arctic Climate and Terrestrial Ecosystems Summer Workshop, International Arctic Research Center, University of Alaska, Fairbanks. Workshop and travel expenses.
- **2003** Center for Accelerator Mass Spectrometry, Lawrence Livermore National Laboratory. Use of sample preparation facility and AMS data.
- **2003** Hudson River Foundation, Graduate fellowship.
- **2003** Gloria Radke Memorial Prize, Department of Geosciences, University of Massachusetts.

PROFESSIONAL AFFILIATIONS

- Earth Science Information Partners (ESIP)
- American Geophysical Union (Biogeosciences Section)
- Symposium of Northeastern Accelerator Personnel (SNEAP)
